## Experience

### Vantaca, Wilmington, NC (Remote) — Front-End Engineer

July 2024 - Present

- Led front-end direction on the Revenue Manager portal, an extension of the core Vantaca offering and the first React application at Vantaca.
- Established consistent coding standards, coherent folder structure, Typescript patterns, a shared component library, and more.
- Worked with the back-end team to standardize inconsistent models within the database and normalize API endpoint naming.

### Affinity, San Francisco, CA (Remote) — Front-End Engineer

October 2021 - February 2024

- Developed new features on Affinity's flagship CRM product, a relationship intelligence platform built using React and Typescript.
- Built both the Outlook and Chrome extensions, which serve as convenient tools for accessing a suite of features previously only available in the main web application.
- Acted as a key member of the cross-team collaborative effort focused on developing the internal design system, as well as other reusable modules available to all front-end applications.

### Heretto, Rochester, NY — Software Developer

August 2020 - October 2021

- Created a multi-tenant content portal which helps users navigate complex technical documents served by the Heretto content API and allows customizable styling for individual clients.
- Clients included AT&T, Viewpoint, ACS Technologies, Medallia, Heretto's internal self-service portal, and more.
- Built using React, Typescript, and Web Components to circumvent React's weakness in rendering external HTML.

### Ellucian, Rochester, NY — Software Developer

February 2017 - August 2020

- Rebuilt existing Tenant Management Service in React. This tool manages all user and account access for other Ellucian products.
- Built React component library later adopted into the official Ellucian Design System, working directly with that team adapting existing components and developing new ones.

## Skills

React, HTML, CSS, Javascript, Typescript, TanStack Query, Tailwind, Jest, Node.js, PostgreSQL, Git

Photoshop, Audacity, AWS, Next.js, Webpack, ESLint

## Education
