

Christian Gileski

Spec-Driven Developer | React Engineer | Design Systems Architect

Experience

Vantaca, Wilmington, NC (Remote) — Front-End Engineer

July 2024 - Present

- Rebuilt Vantaca's email designer, responsible for sending up to 30 million emails to community members per month.
- Redesigned and modernized Vantaca Home, one of Vantaca's primary homeowner-focused offerings, helping grow ARR by \$6m+ in 2025.
- Launched Revenue Manager for all clients in Q1 2025, seeing heavy adoption by users, contributing to seven-figure increases in revenue.

Affinity, San Francisco, CA (Remote) — Front-End Engineer

October 2021 - February 2024

- Developed widely-used customer features on Affinity's flagship CRM product, a premiere relationship intelligence platform.
- Built both the Affinity Outlook and Chrome extensions, launched in 2022 and directly contributing to significant increases in ARR since release.
- Acted as a key member of the cross-team collaborative effort focused on developing the internal design system, as well as other reusable modules available to all front-end applications.

Heretto, Rochester, NY — Software Developer

August 2020 - October 2021

- Created a multi-tenant content portal which helps users navigate complex technical documents served by the Heretto content API and allows customizable styling for individual clients.
- Clients included AT&T, Viewpoint, ACS Technologies, Medallia, Heretto's internal self-service portal, and more.

Ellucian, Rochester, NY — Software Developer

February 2017 - August 2020

- Built the Tenant Management Service. This client-facing tool manages all user and account access for other Ellucian products.
- Built React component library later adopted as the official Ellucian Design System, working directly with that team adapting existing components and developing new ones.
