

Christian Gileski

Spec-Driven Developer • React Engineer • Design Systems Architect

Rochester, New York • christiangileski@gmail.com • (845) 857-3956 • [LinkedIn](#) • [Personal Site](#)

Front-End Engineer with 8+ years of experience developing scalable, high-performance web applications using React and Typescript. Experienced in building responsive UI components, translating designs into production-ready code, and integrating RESTful APIs. Proficient in utilizing AI to convert concepts into delivered products, from inception documents to deployment. Proven ability to deliver user-focused, enterprise-level applications.

Technical Skills

Front-End Technologies: React, Typescript, Javascript (ES6+), Node.js, HTML5, CSS3, Tailwind, TanStack
Front-End Concepts: Git, Component-based architecture, responsive design, cross-browser compatibility, accessibility, state management (TanStack Query, Context API, etc.), end-to-end testing
Tooling and testing: Claude Code, Jest, React Testing Library, Playwright, Storybook

Experience

Vantaca Wilmington, NC (Remote)
Front-End Engineer July 2024 - July 2026

- Rebuilt Vantaca's email designer, a template builder responsible for sending up to 30 million emails to customers' community members per month. Utilized Unlayer for a highly user-friendly WYSIWYG experience.
- Redesigned Home, Vantaca's primary homeowner-focused offerings, helping grow ARR by \$6m+ in 2025.
- Launched Revenue Manager, Vantaca's first React application, contributing to seven-figure increases in revenue.
- Established the repository architecture, coding standards, TanStack Query integration, accessibility guidelines, and more to be adopted by all Vantaca React applications.
- Created documentation adding safeguards for AI agents in all facets of development: component structure, data-access layers, architecture decisions, design system implementation, unit testing, anti-patterns to avoid, etc.

Affinity San Francisco, CA (Remote)
Front-End Engineer October 2021 - February 2024

- Developed widely-used customer features on Affinity's flagship CRM product, a premiere relationship intelligence platform utilized across a wide array of industries. Migrated Redux and class-based components to TanStack Query and modern React functional components.
- Built both the Affinity Outlook and Chrome extensions, directly contributing to millions in increases in ARR.
- Acted as a key member of the cross-team collaborative effort focused on developing the internal design system, as well as other reusable React and Typescript modules consumed by all Affinity React applications.

Heretto Rochester, NY
Software Developer August 2020 - October 2021

- Created a multi-tenant content portal which helps users navigate complex technical documents served by the Heretto content API and allows customizable styling for individual clients.
- Utilized configurable client-facing JSON to override the styles of every single HTML element within the portal, allowing both in-house designers and customers to create a fully unique portal experience.

Ellucian

Software Developer

Rochester, NY

February 2017 - August 2020

- Built the Tenant Management Service. This client-facing React application manages all user and account access for other Ellucian products.
- Built React component library later adopted as the official Ellucian Design System, working directly with that team adapting existing components and developing new ones.

Education

Rochester Institute of Technology

Bachelor of Science (BS) - Game Design & Development, 2016

Rochester, NY

Leadership & Activities

- Vantaca Front-End Guild:

Responsible for establishing coding standards, best practices, and overall architecture for all front-end applications within the Vantaca ecosystem.
- Affinity Front-End Dev Group:

Responsible for coordinating changes to Affinity’s in-house component design system, as well as any major changes which would affect company-wide React applications.
- Ellucian Action Committee:

Responsible for onsite team-building events, activities, charity drives, etc.
